

HP Web Jetadmin 10

Loaded with new features and enhanced security, this print management software is faster and easier to use than ever.

HP Web Jetadmin is the printing and imaging fleet management utility that administrators around the world rely upon to remotely manage a wide variety of HP and non-HP devices.

Dramatically improved ease of use

HP Web Jetadmin 10 is packed with features designed to save you time and make your life easy. Enjoy drag-and-drop capability, right-click functionality, single sign-on, a brand new task-based interface, and device discovery based upon Active Directory services—just to name a few.

Efficient fleet management

HP Web Jetadmin 10 puts more information at your fingertips, empowering you to manage your printing and imaging environment more efficiently than ever. Ad hoc reports, customisation templates, improved performance, and a native database all help you work faster and better.

Investment protection

HP Web Jetadmin 10 is not only designed to be an easy upgrade from 8.x, it's also compatible with the new Windows® Vista™ operating system.

New capabilities such as IPsec and consolidated security settings help protect your data by creating a more secure print environment within your organisation.

With HP Web Jetadmin 10, ten years of industry leading printing and imaging management solutions work with you to protect your investment.

- Using a single tool:**
- Install firmware
 - Configure devices
 - Organise devices
 - Conduct remote diagnostics

Install, configure, monitor, troubleshoot and manage printing and imaging devices from anywhere on the network.

Get the most from your printing and imaging environment by using a single tool to manage a wide variety of HP and non-HP network peripherals—including single and multifunction printers, digital projectors, digital senders and even third-party products.

The HP Web Jetadmin 10 interface is easily accessible from anywhere on the network via a web browser through Smart Client technology. It allows you to create settings and configure multiple devices simultaneously, eliminating the need to manually program one device at a time. Set defaults, security, and alerts, as well as MFP digital send settings, such as e-mail, SMTP server, LDAP server and send to fax.

Watch business productivity soar as this solution helps you optimise device usage, control costs, streamline supplies management, and maximise IT efficiency. HP Web Jetadmin provides all of the fleet management capabilities you need in one easy-to-use interface.

Improve productivity and cut costs. Download Web Jetadmin 10 today.

HP Web Jetadmin 10 is designed for simpler operation, faster and better print management, and a more secure print environment.

✓ Behaves more like a Windows application than ever	With right-click functionality and drag-and-drop capability, HP Web Jetadmin 10 is much easier to navigate, organise, and use. Find support topics faster with new searchable help capabilities.
✓ New interface provides common task assistance	Get step by step assistance with the most common tasks under each category. Customisation capabilities allow you to move task modules or turn modules on and off so you see only the most useful ones for your environment.
✓ Single sign-on	Access is easy using existing Microsoft® permissions—you don't have to create and use an additional password.
✓ Discovery based upon Active Directory services	Discovery and auto grouping of devices are based upon Active Directory services groups, with the ability to add printer objects to the Active Directory as part of the print queue creation.
✓ Role-based customisation	Decide what users can view when they access HP Web Jetadmin 10 by controlling the types of information that are accessible by different IT personnel.
✓ More ad-hoc reports and customisable templates	Get better insight into your print environment and help control costs. Track everything from who uses colour and how often they use it, to which devices are used most heavily and which have the highest uptime. Learn how many pages and which application users are printing from and get e-mail reports about overactive users. Proactive supplies reporting and alerts help you easily manage your printing supplies inventory and assess future needs. For accurate reordering on a just-in-time basis, HP Web Jetadmin 10 provides one-click access to HP SureSupply. ¹
✓ Significant performance improvements	By integrating with .NET and incorporating a native database, screen-to-screen movement is faster, and configuration and management tasks are completed more quickly than ever.
✓ Much more device information on a single screen	With the new interface, you will find details about Status, Configuration, Alerts, Groups, Reports, Supplies, and Troubleshooting right at your fingertips—easily accessible through a series of tabs.
✓ Automated migration tools	Enjoy a smooth transition from version 8.x to version 10. It is easy to back up your installation with the included backup and restore script.
✓ New security capabilities	IPsec protects your data and now, with all your security settings consolidated within one configuration window. It is easier to secure your print environment.
✓ Windows Vista™ support	Version 10 works seamlessly with Windows Vista™ and can manage Vista-certified devices.
✓ Intelligent update capability	Automatically support new devices without having to retest or reinstall HP Web Jetadmin 10.
✓ Functions that were once only accessible through plug-ins are now core capabilities	Get improved print environment assessment, enhanced supplies monitoring, and balanced printer deployment with the following features—now standard with HP Web Jetadmin 10: <ul style="list-style-type: none"> • PC Printer Discovery—Provides inventory information about locally connected (USB or parallel) printers. • HP Driver Preconfiguration—Allows driver settings and a new print path to be created. • Report Generation—Offers powerful insight into your print environment with a variety of reports. • Authentication Manager—Enables secure device functions via different log-in methods for each function. • HP Device Storage Manager—Facilitates downloads and management of forms, fonts, macros on HP flash, hard disks or RAM, and provide the ability to initialise, write-protect, and securely erase disks.
✓ Additional application plug-ins, agents, migration tools, and device and language pack plug-ins	The following will be available at product launch at www.hp.com/go/webjetadmin : <ul style="list-style-type: none"> • HP IPsec Plug-in • HP Web Jetadmin SNMP Proxy Agent • WJA 8.x to WJA 10 Migration Tools • HP is partnering with a broad range of device manufacturers to develop and certify vendor and device-specific plug-ins. Device plug-ins add capabilities and configuration items unique to a particular device. The following will be released later in 2007: <ul style="list-style-type: none"> • HP SNMP Trap Generation Plug-in • HP Alert Log Plug-in • A localised release of HP Web Jetadmin will include additional languages.

¹ Programme features and availability may vary by country. For more information, visit www.hp.com/learn/suresupply.

² HP Web Jetadmin 10 does not include mapping or management capabilities for downloadable forms, fonts, and macros. For more information on restrictions, visit www.hp.com/go/webjetadmin.

HP educational courses and services help you take full advantage of Web Jetadmin.

Introduction to HP Web Jetadmin	This Web-based seminar is for IT managers, LAN managers, and technical professionals who want to effectively manage networked peripherals using HP Web Jetadmin.
HP Web Jetadmin: advanced topics	HP Education services offers a series of focused Web-based seminars aimed at exploring such topics as: <ul style="list-style-type: none">• device management• discovery• optimisation• planning and implementation• security• report generation• Web Jetadmin plug-ins
Printing and imaging onsite training	An HP education consultant meets with you to identify the specific training needs of your organisation and to discuss the most appropriate onsite training content to meet those needs.
Implementation and Integration Service	Let our best-in-class experts assist you to gain control of your environment and improve device uptime.
